| **Nervous System Controls and Responds to Body Functions and Directs Behavior** | 1. The brain is the body’s most complex organ.  
2. Neurons communicate using electrical and chemical signals.  
3. Genetically determined circuits are foundation of the nervous system.  
4. Life experiences change the nervous system.  
5. Intelligence arises as brain reasons, plans, and solves problems.  
6. The brain makes it possible to communicate knowledge through language.  
7. The human brain endows us with a natural curiosity to understand how the world works.  
| **The Brain is the Foundation of the Mind** | 1. The brain is the body’s most complex organ.  
2. Neurons communicate using electrical and chemical signals.  
3. Genetically determined circuits are foundation of the nervous system.  
4. Life experiences change the nervous system.  
5. Intelligence arises as brain reasons, plans, and solves problems.  
6. The brain makes it possible to communicate knowledge through language.  
7. The human brain endows us with a natural curiosity to understand how the world works.  
| **Research Leads to Essential Understanding for Therapies** | 1. The brain is the body’s most complex organ.  
2. Neurons communicate using electrical and chemical signals.
